

WORKFORCE | SALES | FIELD OPERATIONS

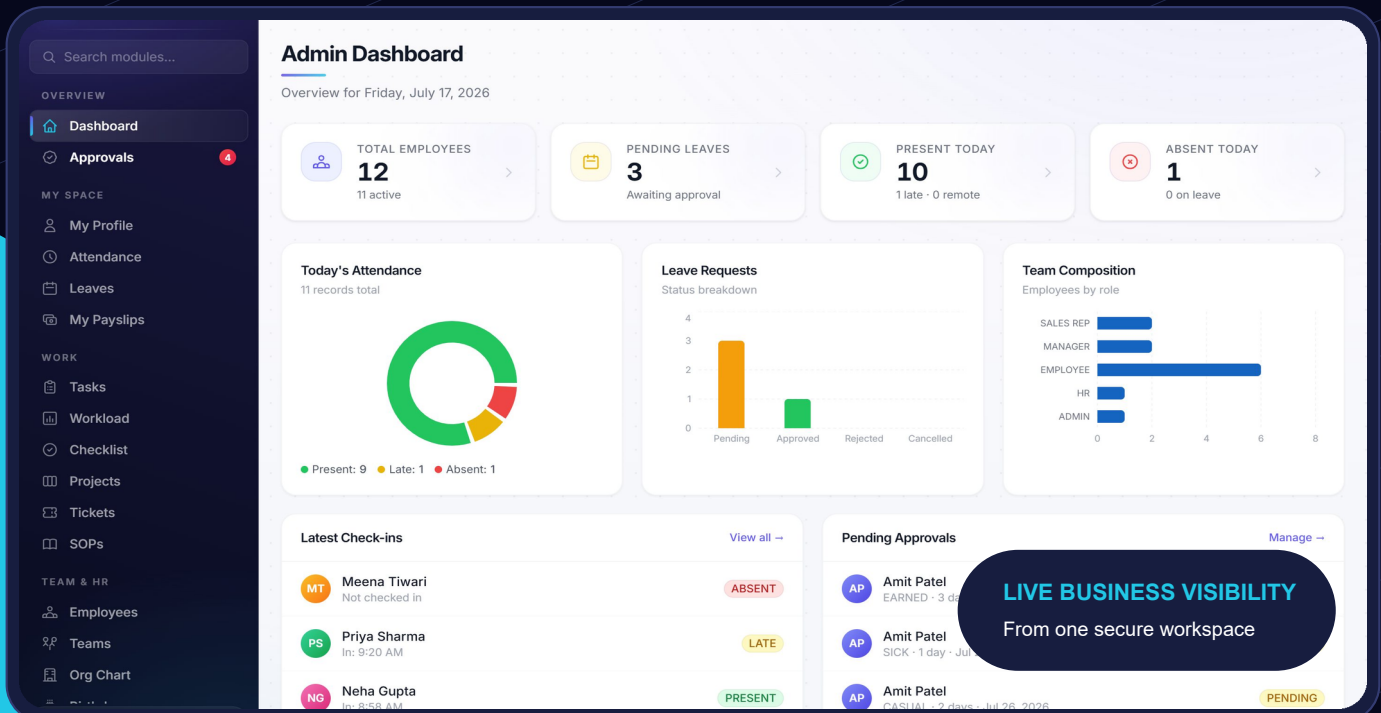

One platform. Every team. One source of truth.

Nyoma connects your people, customers and day-to-day operations so business owners can see what is happening, act faster and scale with control.

15+ connected modules

Web and mobile

AI built in

WHAT NYOMA IS

A connected operating system for modern businesses.

Nyoma is a cloud platform for managing employees, work, customers, field activity and business intelligence. It brings office teams and field teams into one shared workflow - replacing scattered spreadsheets, chats and disconnected tools with reliable, role-based information.

CLARITY

See attendance, tasks, sales, field activity and approvals without chasing updates.

CONTROL

Give each person the right access, standardise workflows and retain an audit trail.

MOMENTUM

Turn operational data into dashboards, alerts and practical next actions.

HOW NYOMA WORKS

From setup to insight in four connected steps.

01

Configure

Set up your company, teams, roles, policies and the modules you need.

02

Connect people

Invite employees and managers; everyone sees the right workspace for their role.

03

Run the work

Teams check in, manage tasks, update customers, record visits and process approvals.

04

Decide with confidence

Dashboards, alerts and AI-assisted insights turn activity into action.

WHAT NYOMA PROVIDES

Your business capabilities - connected.

Choose the modules that fit today. Add more as your workflows mature, without rebuilding your operating system.

01 People and attendance

Employees, teams, leave, geofenced attendance and role-based access.

02 Tasks and projects

Assignments, Kanban work, milestones, time logs and productivity views.

03 GPS and field visits

Live positions, route history, customer visits, stops and travel evidence.

04 CRM and sales

Customer 360, leads, pipelines, governed orders, pricing and activity history.

05 Delivery and returns

Dispatch, manifests, proof of delivery, partial outcomes, returns and backorders.

06 HR and payroll

Salary structures, overtime, pay runs, local rules, payslips and HR documents.

07 Expenses and approvals

Claims, supporting evidence, manager decisions and a consolidated inbox.

08 Tickets and SLA

Internal and customer tickets, priorities, breach alerts and escalation workflows.

09 SOPs and checklists

Repeatable processes, step ownership, acknowledgements and adherence tracking.

10 AI and analytics

Business briefs, email triage, CRM insight, KPI dashboards and report exports.

11 Chat and meetings

Team communication, notifications, shared calendars and connected meetings.

12 Integration foundation

Controlled onboarding for accounting, ERP and warehouse data flows.

ONE LOGIN. SHARED DATA. FEWER SILOS.

Available on the web and mobile

WHY BUSINESS OWNERS CHOOSE NYOMA

Visibility. Discipline. Room to grow.

A complete view

Office work, field execution, sales and people operations come together in one decision-ready picture.

Practical control

Permissions, approvals, audit history and tenant separation help protect how work and data move.

Less tool switching

Connected modules reduce duplicate entry and make handoffs between teams easier to follow.

Built to scale

Start with the workflows you need, then extend access, modules and integrations as the business grows.

LET'S TALK ABOUT YOUR BUSINESS

See Nyoma in action.

Book a tailored walkthrough to see how Nyoma can fit your teams, field workflows and growth plans.
